

EN6903: Mechanical Fundamentals

Course Details				
Course Code:	EN6903			
Course Title:	Mechanical Fundamentals APPROVED			
Short Title:				
Course Level::	Level 6			
Valid From::	2016/2017 Sem 1			
Credits::	15			
Owner:	Engineering Technology			
Assessment Method:	Achievement			
Course Aim	To provide students with an understanding of the principles of engineering mechanics			

CILO				
On Completion of this course, the learner will be able to				
#	Learning Outcome Description			
	Demonstrate an understanding of SI Units, fundamental, supplementary & derived units, and apply the concepts of mass, force, moments, torque and equilibrium conditions in engineering systems			
2	Apply the concepts of energy, energy conservation and conversion as related to mechanical engineering systems			
3	Analyse & solve linear motion problems involving inertia, momentum and impulse to formulate requirements of power and energy needs			
4	Examine and solve angular motion problems including centripetal and centrifugal forces and rotational inertia for various engineering applications			
5	Justify & apply the laws of friction to simple engineering problems			

No requisites

Examinations

Assessment Type Examination (Unseen)

No Other Controlled Assessments

Uncontrolled Assessments

Assessment Type Practical Project
