EN8153: Renewable Energy Technology and Sustainability

Course Details

Course Code:	EN8153		
Course Title:	Renewable Energy Technology and Sustainability	APPROVED	
Short Title:	Renewable Energy		
Course Level::	Level 8		
Valid From::	2019/2020 Sem 1		
Credits::	15		
Owner:	Engineering Technology		
Assessment Method:	Achievement		
Course Aim	Develop an understanding of renewable energy as environmental necessity and economic opportunity as well as a means to enable sustainable development. The students will be introduced in several alternative energy technologies and will focus on solar and wind power projects analysis and development according to the local and regional market needs.		

CILO	
On Completion of this course, the learner will be able to	
#	Learning Outcome Description
1	Identify and critically evaluate current development and emerging trends within the field of renewable energy technologies.
2	Design sustainable renewable energy solutions for real world problems which address geographical, environmental and financial constraints.
3	Communicate sustainable energy projects outcomes with peer, technical and non-technical audience in written and verbal professional standards forms.
Requisites	
<ul style="list-style-type: none"> Pre Requisite: 60 credits at level 7 from the B.EngTech mandatory courses for the student's major 	

Examinations
Assessment Type Examination (Unseen)
Other Controlled Assessments
Assessment Type Lab Assignment
Uncontrolled Assessments
Assessment Type Practical Project
