

APPROVED

EN6903: Mechanical Fundamentals

Course Details

Course Code:	EN6903
Course Title:	Mechanical Fundamentals APPROVED
Short Title:	
Course Level::	Level 6
Valid From::	2016/2017 Sem 1
Credits::	15
Owner:	Engineering Technology
Assessment Method:	Achievement
Course Aim	To provide students with an understanding of the principles of engineering mechanics

CILO	
On Completion of this course, the learner will be able to	
#	Learning Outcome Description
1	Demonstrate an understanding of SI Units, fundamental, supplementary & derived units, and apply the concepts of mass, force, moments, torque and equilibrium conditions in engineering systems
2	Apply the concepts of energy, energy conservation and conversion as related to mechanical engineering systems
3	Analyse & solve linear motion problems involving inertia, momentum and impulse to formulate requirements of power and energy needs
4	Examine and solve angular motion problems including centripetal and centrifugal forces and rotational inertia for various engineering applications
5	Justify & apply the laws of friction to simple engineering problems
Requisites	
No requisites	

Examinations
Assessment Type Examination (Unseen)
No Other Controlled Assessments
Uncontrolled Assessments
Assessment Type Practical Project
Assessment Type Practical Project
